E   Enjoyable Entree
Time limit: 1s

For many days now, the canteen in Hilbert's Hotel has been offering its famous *Fibonacci Soup*. Today is the nth day that they offer the soup, and the recipe changes every day:

π-tato and τ-mato soup. Picture by RitaE, Pixabay

- On the first day, it is a π-*tato soup*, made from a blend of local potato varieties, and served with onion strips and celery.

- On the second day, it is a τ-*mato soup*, consisting of puréed tomatoes, together with carrots, onions, garlic, and basil leaves on top.

- On every day after that, the soup is made from two ingredients, the soup of the previous day and the soup of the day before that, mixed together in equal parts.

Find the composition of today's Fibonacci Soup.

Input

The input consists of:

- One line with a single integer n ($1 \leq n \leq 10^{18}$), the current day.

Output

Output two real numbers π and τ ($0 \leq \pi, \tau \leq 100$), giving the percentages of π-tato soup and τ-mato soup in the nth day's Fibonacci soup. Your answer will be accepted if the absolute or relative error is at most 10^{-6}.

Sample Input 1	Sample Output 1
1	100.0 0.0

Sample Input 2	Sample Output 2
3	50.0 50.0

Sample Input 3	Sample Output 3
7	34.375 65.625
